REPORT OF THE BOARD OF DIRECTORS.

BOARD OF TRADE,
KANSAS CITY, Mo., Jan. 14, 1878. }

To the Members of the Board of Trade :

GENTLEMEN—In compliance with the rules of the association, your directors submit the following report:

RECEIPST.

| | |
|---|-------------|
| Bills receivable last report..... | \$ 450 00 |
| From clerk's tickets..... | 80 00 |
| From membership fees..... | 6,500 00 |
| From Mastin bank (advances on room) | 2,067 00 |
| From fees, arbitrations and appeals..... | 50 00 |
| From first mortgage bonds..... | 25,000 00 |
| From rents (offices, bank and hall)..... | 4,585 35 |
| From interest | 5 00 |
| From note (third mortgage)..... | 7,000 00 |
| Total..... | \$45,687 35 |

DISBURSEMENTS.

| | |
|--|-------------|
| Paid on real estate and building..... | \$38,735 86 |
| Paid expenses, including salaries and furniture..... | 3,415 65 |
| Paid A. J. Kelley, architect..... | 272 50 |
| Paid interest, (bonds and overdrafts)..... | 1,855 00 |
| Paid taxes..... | 355 41 |
| Paid Mastin Bank (in rents) | 500 00 |
| Paid old Board of Trade..... | 20 00 |
| Paid for heating..... | 249 62 |
| Paid profit and loss | 16 50 |
| Paid overdraft last report..... | 1,373 54 |
| Paid bills receivable (notes now held)..... | 165 00 |
| Total..... | \$46,959 08 |

| | |
|---------------------|-----------|
| Total receipts..... | 45,687 35 |
|---------------------|-----------|

| | |
|--|-------------|
| Deficiency (overdraft on treasurer)..... | \$ 1,271 73 |
|--|-------------|

The debt of the Board is as follows:

NOT DUE.

| | |
|---|-------------|
| First mortgage bonds, 8 per cent..... | \$25,000 00 |
| Second mortgage bonds, 10 per cent..... | 10,000 00 |
| Third mortgage note, 8 per cent..... | 7,000 00 |

| | |
|------------|-------------|
| Total..... | \$42,000 00 |
|------------|-------------|

DUE AND UNPAID.

| | |
|--|-----------|
| Coupons, first mortgage, Jan 1, '78..... | \$ 833 33 |
| Coupons, second mort., Jan. 1, '78. | 255 77 |
| Mastin bank..... | 1,567 00 |
| Overdraft on treasurer..... | 1,271 73 |

| | |
|-------------|------------|
| Total | \$3,927 85 |
|-------------|------------|

| | |
|-----------------|-------------|
| Total debt..... | \$45,927 85 |
|-----------------|-------------|

The association is at this time owner in fee simple of the building occupied, which has been erected during the past two fiscal years, at a cost of \$47,468.90, which, together with the ground upon which it stands, for which our predecessors paid \$15,700,

makes a total of real estate investment of \$63,168.90. Of this sum, \$21,000 was derived from memberships, and the balance from loans. The incumbrances on the property are the three mortgages above mentioned, upon which accrues an annual interest of \$3,000, until reduced by the payment of bonds, which begin, by their terms, during the ensuing year. The offices and bank room are now rented at the rate of \$13,557 per annum, which, if it can be maintained, will provide for all the expenses of keeping up the property and the payment of the debt, leaving an annually increasing balance as the debt and interest obligations are reduced by payment.

The third mortgage and one bond of the first mortgage fall due within the ensuing year, to meet which, together with the current expenses of the property, requires a larger sum than the estimated income from the building; hence, your directors have deemed it necessary to make an assessment of ten dollars upon each member for this purpose.

We have the pleasure to report the association in a very healthy and prosperous condition. Sixty-five new members have been admitted during the year; one member has been expelled, and one, an estimable and valued citizen and neighbor, has been called to his last rest. This leaves our present membership two hundred and seven, which is certainly a very satisfactory membership for a Board of Trade in a city so new as ours, and containing a population of only 41,000, and within the second year of its corporate existence.

The Exchange during the past year has thrived and increased in activity and interest, and has exerted a potent effect in systematizing business in our market and in attracting and concentrating here the trade of the country adjacent. While, therefore, the attention of your directors has been engrossed with the provision of funds and the work of construction, the commerce of the city has grown probably faster than it could have been made to do by any other effort of ours. But in the erection of the present commodious building and the provision thereby of the conveniences for business, we feel assured that we have laid broad and permanent foundations upon which it will be the acceptable task of our successors to build a grand superstructure of trade.

The enterprise of erecting this building was undertaken in April, 1876. In determining its feasibility, committees were appointed to solicit subscriptions and ascertain if a sufficient amount of money

could be raised. These committees obtained a subscription of \$14,200 in memberships and \$10,000 in a second mortgage, leaving the Board free to raise such other money as might be needed on a first mortgage. It was then ascertained that \$20,000 could be obtained on a first mortgage provided the total investment should not be less than \$45,000. Estimates for building were obtained which indicated that the outlay for this purpose would be about \$31,000. Ground was then purchased at a cost of \$15,700, and by the middle of the August following the Board was ready to commence the work of building. For many reasons the progress of the work was delayed, and it was found as it progressed that the cost exceeded the estimates. This made it necessary for the Board to provide further means, which was done by increasing the first mortgage to \$25,000, and by borrowing \$7,000 on a third mortgage. These, together with the new memberships taken by persons who desired to become actively connected with the market, provided for the deficiency, less a balance of between three and four thousand dollars, which has since been reduced by rents to the present overdraft on the treasurer, which, with our present income, we can look forward to seeing paid at no distant day.

In closing our report, we take occasion to return our sincere thanks to the members of the Board of Trade for the cordial co-operation we have received from them in the exceptional work we have been called upon to perform, and also to the chairman and members of the building committee, who have borne the brunt of the work, and faithfully and devotedly addressed themselves to the arduous task before them. To them the Board of Trade owes a debt of gratitude which, we feel assured, it will take pleasure in remembering and honoring as occasion offers.

F. B. NOFSINGER, *Pres't Board of Trade.*

GENERAL REVIEW.

BOARD OF TRADE, KANSAS CITY, MO., }
January, 1878. }

Dr. F. B. Nofsinger, President of the Board of Trade :

DEAR SIR—I have the honor and pleasure herewith to submit my First Annual Report of the Trade and Commerce of Kansas City, covering the year 1877. In doing so, I take the liberty to congratulate the Members of the Board on account of the present healthy and prosperous condition of the Association, and the citizens generally on account of the satisfactory condition of trade during the year, the many evidences of prosperity and development manifest around us, and the gratifying prospects for future business development.

GROWTH OF THE CITY.

The population of Kansas City has been increasing rapidly for the past year and a half. The last estimate of population published in our City Directory was in 1873, when it appeared that the population was 40,740. I am informed by Mr. J. H. Ballenger, who compiles our Directory, that the population in June of the year under review, was 41,786, showing an increase since 1873 of 1,046. Mr. Ballenger also informs me that immediately succeeding the panic of 1873, the population fell off considerably—a fact attributable to the depression of industrial interests and the cessation of public improvement. About July, 1876, this lost population began to come back to us, and by the beginning of 1877 the tenement houses of Kansas City were again full. Since that time, several hundred additional houses have been built and filled, and all vacant rooms over business houses have been occupied also; so that it is estimated that the new population coming in within the past year and a half does not fall materially short of eight thousand people.

The movement of Real Estate likewise shows an improvement. There has not been so much of an improvement in the number of transfers, as in the better tone of the market, the higher valuation at which it is held, and the advance of rentals, which latter will average not less than fifty per cent.

There has been no great enlargement of the industrial interests

of the city, but establishments previously existing are doing much more business and employing a larger number of mechanics, and are generally much more prosperous.

In all these respects the city is now in a very satisfactory condition and the prospect very encouraging.

GENERAL TRADE.

The general trade of the city has been improving during the year. No attempt has been made to compile statistics of the jobbing trade, as was annually done by the city press in former years, because such statistics are but estimates, and not sufficiently accurate for the purposes of official report. I am informed, however, by gentlemen engaged in the various lines of trade, that sales have been larger during the past year than during any previous year. The extent of territory embraced within the trade limits of Kansas City has increased in equal ratio to former years, while there has been a larger number of merchants in former trade limits doing business with us. Our merchants buy their merchandise at first hands, on equal terms with the jobbers of other Western cities, and by the saving of through rates of freights over short routes, and by acting upon the principle of "large sales and small profits," are able to make it to the advantage of merchants in the cities and towns around us to buy their merchandise here instead of other Western cities. The stocks kept in the city are likewise large and varied, and merchants around us can obtain what they want so much quicker of us, that it is not necessary for them to carry so large stocks as if trading further from home, and they are thus enabled to maintain more varied lines with the same capital.

These facts create a tendency to concentrate trade at Kansas City, a tendency which cannot but increase with coming years, and the improvement and enlargement of stocks resulting from improvement and enlargement of trade. Therefore, while we now enjoy a large and satisfactory trade, embracing a large proportion of that arising from the States and Territories around and West of us, it is but a question of time when Kansas City will be the undisputed metropolis of a larger extent of country than any other city west of the Allegheny Mountains.

During the year, Kansas City's commercial position has been materially advanced. Not only has her trade and commerce been larger, but it has attracted more attention abroad. The Associated Press has sought and secured daily reports of quotations by telegraph. It has been put on the list of grain markets reporting

stocks to the New York Produce Exchange, and latterly the Gold and Stock Board have made arrangements for weekly statements of the grain stocks held here, the stocks having become sufficient to affect the calculations of merchants. In this latter respect she has ranked about tenth among the grain markets of the United States and Canada reporting to the New York Produce Exchange. More than this, she has received from her great competitor for Western trade—St. Louis—a most important and significant recognition. The *Globe-Democrat* of that city, in discussing the rivalry between that city and Chicago for Western trade, recently used the following language:

“The Kansas Pacific, the Atchison, Topeka & Santa Fe, the Leavenworth, Lawrence & Galveston, the Missouri River, Fort Scott & Gulf roads, receive freight and passengers with sublime impartiality, and deliver them with equal indifference alike to St. Louis or to Chicago. They have neither interest nor affiliation east of Kansas City, which is the pivot on which the trade hinges, the key which opens or closes the door. Hitherto we have held the key, and before we lose possession of it, it is worth while studying the situation, to find out where we will be when Chicago has the direct connection which is now reasonably assured.”

Again, it says: “A glance at the map shows that from this center roads are pushing out like the leaves of a fan, and extending themselves to follow the march of civilization, and to help the growth of business in the new grazing and mining regions beyond.”

And, again: “It is no part of our purpose to deny or to evade the facts, even if the facts should be disagreeable, but there could hardly be any more pleasant mission than to proclaim to all the world that the chief city of the western border of our State is not only an active, energetic young giant, but that it holds a position which is not likely to be shaken by any future changes in the business growth of the country. We do not hesitate to say that the position of Kansas City and its future are quite as well secured as those of any other city of three times its size, and the country west of it cannot grow without aiding its development.”

THE FINANCIAL SITUATION.

Owing to the large numbers of live stock held in the country commercially tributary to Kansas City, and the favorable season for agriculture and mining, money has been reasonably plenty during the year, notwithstanding the financial stringency in the United States, resulting from the present unhappy financial situation. Our people have had enough, as the result of their thrift and industry, and the prolific productions of our new country, to carry on their ordinary business without much inconvenience, and our banking and financial institutions have escaped wholly the disaster that has

overtaken so many similar institutions in other parts of the country.

Notwithstanding the small amount of capital invested in banking in Kansas City, our banks were able to meet all business demands, and prevent any sense of stringency, until near the close of the year, when the unusually large number of cattle being held and fed in the country, the unusual accumulation of wheat in this market, and the unfavorable weather for packing operations, and the consequent necessity of holding over unusually large numbers of live hogs, made such great demands upon them that an uncomfortable feeling of stringency arose in business circles, not such, however, as to lead to material loss. But, for the first time in our history, Kansas City really felt the need of additional banking facilities.

Succeeding the panic of 1873, there arose a tendency on the part of country banks to keep their surplusses deposited here, instead of banks further East. Our banks, with the sagacity and enterprise for which they are characterized, encouraged it, and thus became the depositories of a very large number of banks in Western Missouri, Kansas, Colorado, New Mexico, Texas, Wyoming and Nebraska. This fact has supplied our banks with a large amount of funds for business purposes, and, while strengthening them, has enabled them to do a larger business in proportion to their capital than is done by banks anywhere else in the United States. This tendency of banks around us to keep their capital here, has materially increased during the year, and a larger number are now doing so, some of which are in more remote localities than any that did a like business here in previous years. This is a gratifying fact, as it shows that Kansas City is rapidly becoming the financial center, as well as the commercial metropolis and market for the States and Territories around us.

THE MARKETS.

The markets of Kansas City have experienced marked improvement during the year. The amount of property coming into them for sale has much increased, and, in many respects, was of improved quality. There has been an increase of merchants engaged in purchasing and forwarding the produce offered, and with the increase of men there was also an increase of money. The markets have been active during the year, and have sustained their former high valuations as compared with other markets.

LIVE STOCK.

The number of animals seeking a market here has been largely

increased, as will be seen in the tables herewith submitted. This is due to the large increase of live stock in the country commercially tributary to this city. There has been a large increase in the number of cattle, owing partly to natural increase and importation of "native" cattle, and to the annual drive from Texas, which has well stocked all the States and Territories west of us. The increased number of cattle received here is due, also, partly to the shipment from Wyoming, Utah and Oregon, which, for the first time, become patrons of this market. The number received from these remote localities was quite large, while New Mexico and Colorado also sent larger numbers. The quality of the cattle offered here was also much improved. In former years there was more or less of the annual drive from Texas that found a market here the first season out from Texas, the number annually diminishing from 1871 down to the present. This year there was not enough of that kind of cattle offered in this market to establish prices, the demand from western ranchmen being such as to take them all, at prices that precluded their sale here. Those offered here, therefore, were largely natives and Texas cattle that had been wintered at the western ranches, whereby they became much improved. The annual drive from Texas, since 1867, has been large, and has resulted in the establishment of ranches in Western Kansas, Colorado, New Mexico, Wyoming, Nebraska and Utah, where this class of cattle are now held and fattened for this market. The number of these cattle so held, as well as the number of natives, is unusually large at this time, and therefore present an unusually bright prospect for an active market the coming year.

By the grasshopper invasions of 1874 and 1875, the corn crop in some parts of the country that patronizes this market was damaged, which led to a reduction of the hog growing interest. It has been gradually reviving since that time, and the number of hogs now in the country is much larger than at any previous time. The tables following show largely increased receipts here for 1877, and unless this interest meets with new disaster, it will rapidly develop hereafter, and will soon bring Kansas City up to a high rank as a pork producing city.

The number of sheep held in this country is likewise rapidly on the increase. The present tariff on wool and woollen manufactures has been found strongly stimulating to this important branch of husbandry, and as no country in the world offers such advantages for it as Kansas, Nebraska, Wyoming, Colorado and New Mexico, many men and much money have found employment

therein. It is rapidly becoming one of the great interests of these States and Territories, and needs only the letting alone of the wool tariff to become one of the leading western interests and a great national blessing. The tables following will show a largely increased receipt of sheep in this market, besides which the receipts of wool have been larger, and amount to millions of pounds annually. The wool and the sheep of all the western country have found a market at Kansas City, and with the development of this interest our prosperity must increase.

PROVISIONS AND PACKING.

Closely combined with and dependent upon the live stock interest, is the already immense and growing packing and provision interest of the city. The provision market has not materially changed in character during the year; that is, the Board of Trade has not as yet taken any orders to put it upon more of a commercial basis, and packers still job out their products. But there has been an increase of the number of animals slaughtered, and an extension of the trade both in the amount of product handled and the extent of country supplied. It will be noticed in the tables following that there was a large receipt of hog product during the year, which is the result of other places in the Missouri Valley, that pack hogs, seeking a market here for their product, and also of the fact that the provision trade of the city exceeds the annual product, the deficiency being supplied by importation from Chicago at such times as the local product is found insufficient. The principal improvement in the packing business during the year was the erection of a large addition to the house of Plankinton & Armour, for summer packing, which doubles their capacity for that branch of the business. Summer packing is now a generally established fact, and by rules recently adopted by the Board of Trade, summer meats are made standard here as well as winter. The business will hereafter continue the year round, and, so far as Kansas City is concerned, there will be no more "season" about the packing of hogs.

In beef packing, Kansas City has for years been the leading city, not only of the United States, but of the world, and for mess beef is the principal source of supply. That she will continue to hold this high rank, is indisputable, as she gets the cattle fresher and in better condition, and can do the work at less cost.

Another important branch of this business, which had its origin the year previous, but advanced to a much higher position in 1877, is the fresh beef trade. The house of Nofsinger, Harper

& Co. confined itself almost entirely to this branch of business during the year, and found it encouraging. The cattle, taken here fresh from the western pastures, are slaughtered and shipped as fresh beef, in refrigerator cars, to the eastern cities, where the superior quality of the beef gives it ready sale. As yet, the business is mostly confined to the winter and spring and fall. The refrigerator cars have not yet been so far perfected as to be entirely safe for summer business, but improvements made in them warranted several large shipments the past summer, and the result was moderately successful. It is hoped and believed that the cars will yet be so far perfected as to make the business as safe and prosperous in summer as at other seasons.

GRAIN.

In no respect has the development of Kansas City markets been so marked during the year, as in grain. This market is the active element of our Board, and probably employs as many men and as large amounts of money as any other one branch of business. This market had already attained such position during the previous year as to render a daily exchange necessary. This institution was established in June, 1876, and attained a gratifying degree of activity in the crops of 1876, bringing into the market a large number of men and larger capital, as well as attracting hither a much larger amount of grain. Although the Union Elevator had gone into operation early in the February previous, it became apparent in the fall of 1876 that the four then in operation would not be requisite to do the business of the market, and the Arkansas Valley was built and went into operation in June, 1877. The prospect of large harvests and the rapid development of the business on 'Change, showed the necessity of further capacity, and the Missouri was the result, which, making the sixth, besides several smaller ones, is now about ready for business, and will probably be receiving grain before this report reaches the public.

The market in Kansas City, attracting hither larger receipts of grain, became very active. Its animation seemed to increase during the first half of the year, notwithstanding the supply of grain to come was gradually diminishing, but with the offering of the new crop in July and August, it took a long stride forward, and it became no unusual thing for four and five hundred car loads of grain to change hands at a single call. In the amounts of grain in store, as reported weekly to the New York Produce Exchange, Kansas City took rank as about the tenth grain market on this con-

tenant. For a market of but three years' standing, this should be regarded as a very satisfactory position. She has steadily ranked all places of equal population and very many of much larger population, and many of long standing as markets.

The range of prices prevailing in this market has continued high throughout the year—so high, in fact, that shipments hence to any other market have been difficult, except as “cuts” in freight rates could be obtained. The winter wheat receipts, since the offering of the new crop, have exceeded the demand of mills patronizing the market, and as shipment elsewhere was difficult, there has been a tendency to accumulation here. Winter wheat being too high priced usually for export, seeks a milling demand in the United States, and although the number of millers patronizing this market largely increased in numbers during the year, the receipts of grain increased more rapidly. Still, however, the speculative features of the market, which developed with wonderful rapidity after harvest, kept prices above shipping values.

The receipts of corn into the market were likewise much larger, but prices did not reach so high a range in comparison with other markets, as in wheat. The movement forward was very steady during the year, except just before the opening of lake navigation, at which time the high railroad tariffs stopped the movement for a few weeks, until the accumulation here reached 370,000 bushels, which was on the 16th of March. Reduction of rates incident to the near approach of lake navigation, caused the movement to be resumed, however, and since that time it has been steady. Until about October 1st, the direction of the movement was to the lakes, and thence by water to the Atlantic markets. Since that time the movement of corn has been largely down the Mississippi river, our merchants seeking an outlet that way, because of the approach of the closing of the northern water route, and the high rail tariff which for the last ten months of the year precluded profitable shipment by rail to Atlantic markets.

In oats, rye and barley, there was less increased animation during the year, owing to the smaller amounts offered. These crops succeed well in the country about us, but as yet the production is not sufficient to make a very large surplus for market.

QUALITY OF THE CROPS.

A word in regard to the quality of the crops may not be out of place. Among the tables herewith submitted is one showing the inspections since grain was sold on inspection in this market,

from which it will be seen that the crops of small grain for the present year are of inferior quality. This results from unusual rains in the spring and summer, the season being in this respect very unfavorable. Corn, however, will not likely show similar damage, but the early part of the winter has been so warm and damp as to prevent this grain from drying out, and such as has come to market so far does not grade above rejected and no grade, on that account, however well filled the grain.

FLOUR AND PRODUCE.

The market for flour and produce has experienced very reasonable development during the year. The mills in the vicinity of Kansas City have sent here large amounts of their product for market, and the trade has been gaining greater proportions, and a feeling has sprung up among the parties engaged in the trade, favorable to a better system and more active representation on 'Change. It is probable that another year will see this interest brought prominently to the front, and such regulations adopted as will develop it. The flour manufactured in Kansas City is taking high rank abroad, and some of the special brands, I am informed, rank in the South with the best St. Louis manufactures.

The produce market has likewise been active and prosperous. The surplus of garden, field, dairy and barnyard productions of a very wide and prolific extent of country find market here, and from hence go to the Eastern cities or to the mines of the West.

RAILROADS.

During the year 1877, and for several years previous, there was but moderate addition made to the transportation facilities for our commerce, owing to the depression of money matters, which discouraged large enterprises of this character. The principal actual improvement of this kind during the year was the extension of the Junction City & Fort Kearney Railroad, a branch of the Kansas Pacific, to Clifton, Kansas, a distance of about thirteen miles from Clay Center, the former terminus; and the extension of the Central Branch Pacific, now about completed to Concordia, Kansas. This latter road makes its eastern terminus at Atchison, Kansas, but it finds so strong a competitor in the Junction City & Fort Kearney Railroad, for the business of the Republican Valley, that since March last it has been compelled to make rates in conjunction with the Missouri Pacific, from Atchison, to bring the

grain, live stock and produce along its line to this city. The Joplin Railroad has also been built from Girard, on the Missouri River, Fort Scott & Gulf Railroad, to Joplin, Missouri, opening to Kansas City the rich trade of Southwest Missouri and the extensive lead mines about Joplin and Carthage. There is now being organized an interest to extend this road or build a new one to connect with the Little Rock & Fort Smith Railroad, which, in connection with the Little Rock & Pine Bluff Railroad, will give Kansas City a connection with the Mississippi river at Chicot, five hundred and twenty-five miles above New Orleans, and below low water, bars and ice.

Several new interests have taken such form, as will result in the speedy construction of new lines for Kansas City.

One of these is a road in the Solomon Valley, Kansas, where local aid has been secured and the money provided for a new road, and during the ensuing year the facilities will be furnished to bring the productions of that rich valley to this market.

Another is the Kansas City, Burlington & Santa Fé Railroad, which the year previous was built as far as Williamsburg. The money has been secured, and the work of building the line through to Burlington, accommodating the Walnut Valley, is rapidly progressing.

The old Kansas City & Memphis Road was sold in bankruptcy during the year, and fell into the hands of enterprising gentlemen of this city, who expect to complete it to Osceola the coming year.

A new interest has been developed in behalf of extending the Chicago & Alton Railroad from Mexico, Mo., to this city, on the south side of the Missouri River. A new company has been organized for that purpose, the money raised, and a large part of the right of way secured. This road for several years has made its connection to this city by the line of the St. Louis, Kansas City & Northern, but the large increase of business here has caused the stockholders to undertake the extension of their own line. It will penetrate a rich country in the older parts of Missouri not now supplied with railroad facilities, and when completed will afford a new outlet to St. Louis and Chicago, being the only line to the latter named city under one management the entire distance.

This movement on the part of the Chicago & Alton, has led

the Chicago, Rock Island & Pacific, and the Chicago, Burlington & Quincy, both to look toward Kansas City for a connection. This has aroused the long dormant interest in what was once known as the Parkville & Grand River Railroad, a concern that years ago was graded from Parkville, eight miles north of this city, to Cameron, Mo. The old right of way and other interests of the company are now being worked up, and it is probable that one or the other of the roads named will secure it, and make a connection to this city during the coming year. The prospect is that the Chicago, Burlington & Quincy will make a connection here, anyhow, at no distant day, by a new line from Leon, Iowa; and it will not be surprising if both these roads are running to Kansas City before the close of another year.

TRANSPORTATION.

The facilities afforded by the lines touching Kansas City from the eastward; have been of the most unsatisfactory character for the past year. On the 15th of September, 1876, they formed what is known as a pool between points of competition on the Missouri river and points similarly situated on the Mississippi. This pool has continued in existence since, and has afforded Kansas City the first opportunity of complaint of her railroads. The absence of competition has made rates higher and shipping unprofitable. Owing to a similar situation east of Chicago and St. Louis, it has been unprofitable since last February to ship grain by railroad to the Atlantic markets. There is no prospect of such a change immediately as will improve the situation, and it is probable that the present crops will have to find a market in some other direction. The present movement down the Mississippi river relieves the situation somewhat, and is liable, if not likely, to result in the permanent opening of an outlet by that route. Measures to that end are being taken, and, it is believed, will another year make us independent of the pooled lines.

STATISTICS.

I have the honor and pleasure herewith to submit statistical tables, the first prepared in Kansas City from officially kept records. They show the present commercial character of Kansas City, the resources she has to draw upon, and the actual business of the year, better than I can express it; but in submitting them

allow me to say that I appreciate the isolation in which they stand, because of the absence of similar tables for previous years, for purposes of comparison. I have overcome this sufficiently, as far as possible, by using for purposes of comparison such tables of previous reports of the city press as appear to be reliable and appropriate. However, the showing of business done for the year is such, I feel, as Kansas City will be satisfied with, as, in most respects, it far exceeds the business of other cities of like population and wealth.

Very respectfully,

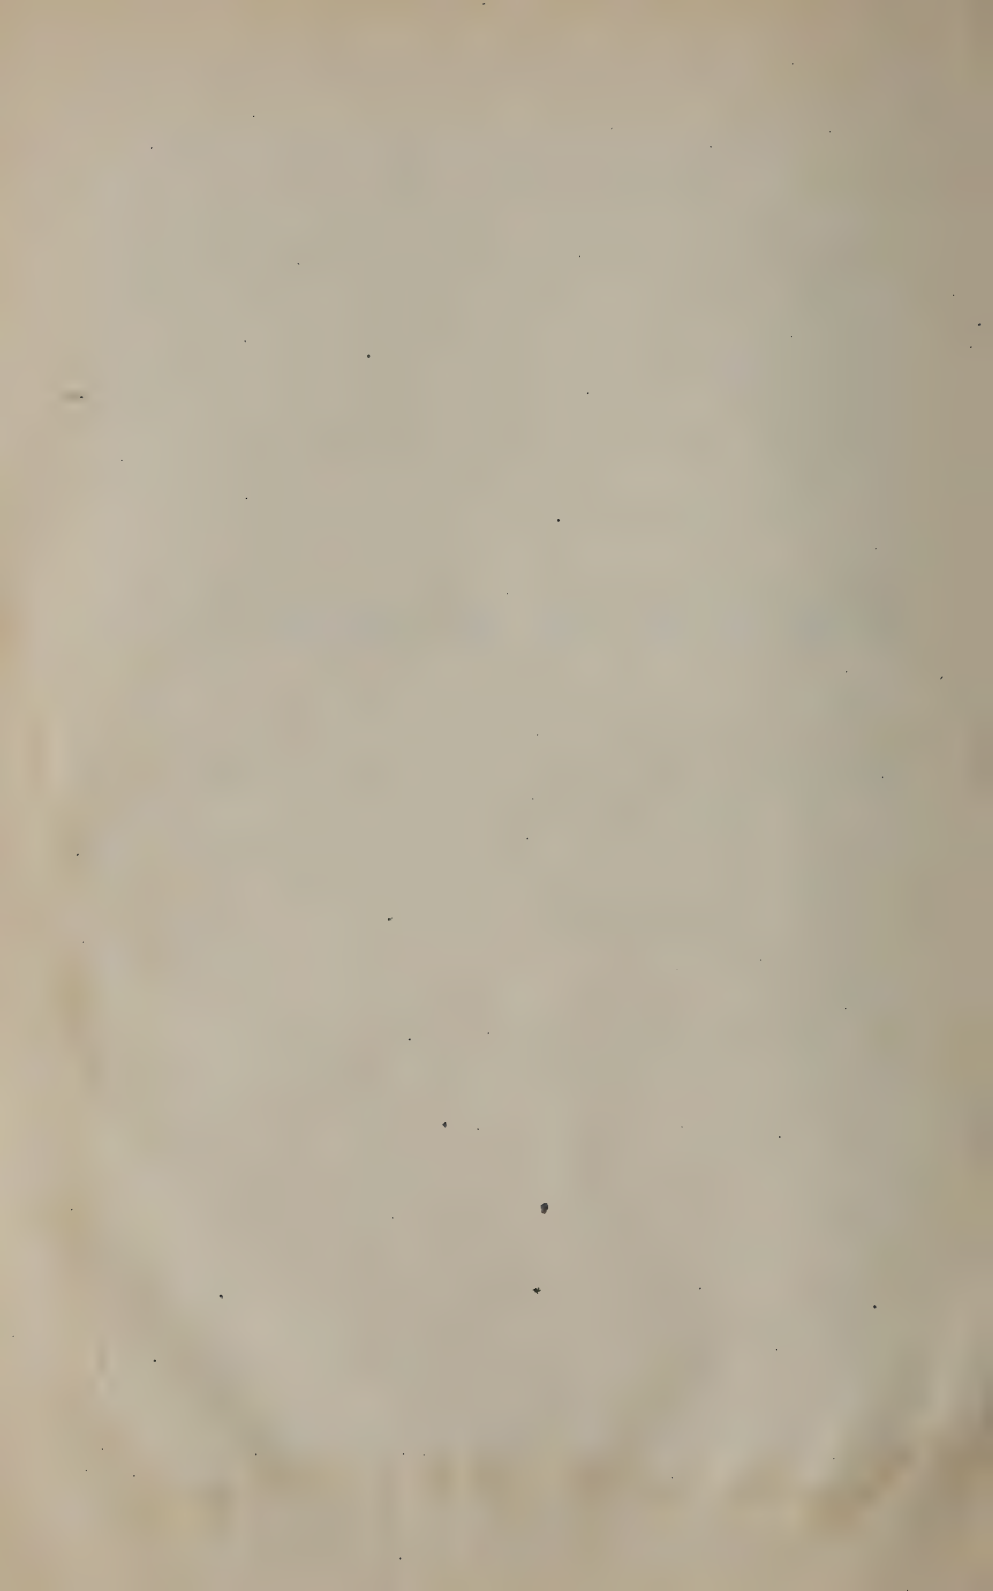

W. H. MILLER, *Secretary*.

NEBRASKA.

DETAILED STATEMENT SHOWING THE COMMERCIAL CONDITION OF NEBRASKA.

STATEMENT showing the total taxable wealth of Nebraska for a series of years, indicating the development of the State:

| Year. | Valuation. | Year. | Valuation. |
|----------------|--------------|----------------|--------------|
| 1867 | \$20,069,222 | 1872 | \$69,873,818 |
| 1868 | 32,632,550 | 1873 | 78,239,692 |
| 1869 | 42,123,595 | 1874 | 80,754,044 |
| 1870 | 53,709,828 | 1875 | 75,467,398 |
| 1871 | 55,513,658 | 1876 | 74,178,645 |

NOTE.—The decreased valuation for 1875 and '76 is attributable to the decline of real estate values, incident to the national financial pressure of the past few years.

STATEMENT OF LIVE STOCK FROM ASSESSMENT RETURNS OF
1875 AND 1876.
